

ENERGETIKA

Approved
International
Event

The International Energy Fair, an UFI licensed event, is the largest annual regional gathering of companies, institutions and professionals in the sectors of electricity, coal, oil and gas, renewable energy sources, energy efficiency and mining.

This specialized event plays an irreplaceable role in connecting all segments and factors of the energy sector, from production and exploitation, through enrichment, distribution, transport and storage to direct use of the existing and potential natural resources and energy sources.

The International Energy Fair is held under the patronage of the relevant ministry and represents an ideal opportunity to connect investors, equipment manufacturers, the relevant administration, financial institutions and local governments.

International Fair of energy, coal, gas and oil pays special attention to the challenges of preserving energy stability and projects of increasing energy efficiency, which represents one of the pillars of sustainable development and constitutes the greatest potential to increase the economic strength of a society.

For many years now, the Energy Fair has been following the development and problems of the Serbian energy sector. The concept of Energy Fair includes renewable and non-renewable energy sources, energy efficiency and energy investments. One of the priorities is the introduction of cleaner energy sources. The total potentials of renewable energy sources are equal to annual consumption of oil derivatives.

In addition to commercial topics, the International Energy Fair pays special attention to scientific and research work, energy related smart technologies, educational support and other areas being a part of the energy foundations and a driver of the entire economic and public life of the country and the region.

Commodity groups:

01

**ELECTRIC
POWER**

02

**MINING AND
COAL**

GAS AND OIL

03

**RENEWABLE
ENERGY
SOURCES**

**BUILDING
ENERGY
EFFICIENCY**

04

**MINING
TECHNOLOGIES**

**HEATING
TECHNOLOGIES**

05

**ENERGY
EFFICIENCY
LIGHTING**

06

**SMART ENERGY
MANAGEMENT**

**INFORMATION
TECHNOLOGY IN
ENERGY INDUSTRY**

**SCIENCE AND
RESEARCH
TRANSFER OF
TECHNOLOGY**
